EV MaxiSEC Columns

Product Information	
Unit Size	3 Columns
Concentration	Please see the protocols for proper use of this product. If no protocol is available, contact technical services for assistance.
Storage	Store at 4C.
Product Description	
Description	maxiPURE-EVs are size exclusion chromatography (SEC) columns designed to isolate extracellular vesicles (EVs) with the same specificity as PURE-EV, but from larger sample volumes. Advantages of maxiPURE-EVs include: Well suited for large volume of dilute matrices (prior 10x concentration recommended), highly pure EV preparations, no residual chemicals from precipitation, and rapid isolation in approximately 30 minutes. Isolated EVs are suitable for a wide range of downstream analyses such as nanotracking analysis (NTA), protein profiling (western blotting, ELISA, Flow Cytometry), and nucleic acid extraction.
Suitable Sample Type	Urine, cell culture supernatant, or other diluted matrices
Sample Volume	5 - 20 mL
