NBP3-11767**EV Precipitation Solution (Cell Culture)**

Product Information	
Unit Size	25 ml
Concentration	Please see the protocols for proper use of this product. If no protocol is available, contact technical services for assistance.
Storage	Store at room temperature.
Product Description	
Description	EV Precipitation Solution (Cell Culture) is a simple and rapid method of high yield extracellular vesicle (EV) isolation from urine samples. Based on polymer precipitation technique, samples are incubated with EV Precipitation Solution on ice and exosomes are isolated after a gentle table-top centrifugation step. Advantages of EV Precipitation Solution include: High yield of EVs, No prior sample concentration required, No special equipment. Isolated EVs are suitable for a wide range of downstream analyses such as nanotracking analysis (NTA), protein profiling (western blotting, ELISA, Flow Cytometry), and nucleic acid extraction.
Suitable Sample Type	Cell culture supernatant
Sample Volume	1-5 mL
Product Application Details	
Application Notes	A 25mL solution is equivalent to 25 reactions (cell culture media)
