| Species                     | Human                                                                                                                                                                                                                                                                                               |
| Immunogen                   | Recombinant fragment of human SBSN protein (exact sequence is proprietary)                                                                                                                                                                                                                          |
| Product Application Details |                                                                                                                                                                                                                                                                                                     |
| Applications                | Immunohistochemistry-Paraffin                                                                                                                                                                                                                                                                       |
| Recommended Dilutions       | Immunohistochemistry-Paraffin 1-2ug/ml                                                                                                                                                                                                                                                              |
| Application Notes           | Immunohistochemistry-Paraffin: 1-2ug/ml for 30 minutes at RT. Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95C followed by cooling at RT for 20 minutes. Optimal dilution for a specific application should be determined. |
