| <b>Product Description</b>         |                                                                                                                                                                           |
| <b>Host</b>                        | Rabbit                                                                                                                                                                    |
| <b>Gene Symbol</b>                 | KPNA5                                                                                                                                                                     |
| <b>Species</b>                     | Human                                                                                                                                                                     |
| <b>Specificity/Sensitivity</b>     | KPNA5 antibody is human specific. KPNA5 antibody is predicted to not cross-react with other Importin alpha family members.                                                |
| <b>Immunogen</b>                   | KPNA5 antibody was raised against a 16 amino acid synthetic peptide near the amino terminus of human KPNA5. The immunogen is located within amino acids 30 - 80 of KPNA5. |
| <b>Product Application Details</b> |                                                                                                                                                                           |
| <b>Applications</b>                | ELISA, Immunohistochemistry-Paraffin                                                                                                                                      |
| <b>Recommended Dilutions</b>       | ELISA, Immunohistochemistry-Paraffin 5 ug/mL                                                                                                                              |
