HLA G Antibody (mem-G/9) [Alexa Fluor® 405]

Product Information Unit Size 0.1 ml Concentration Please see the vial label for concentration. If unlisted please contact technical services. Storage Store at 4C in the dark. Clonality Monoclonal Clone mem-G/9 Preservative 0.05% Sodium Azide Isotype IgG1 Conjugate Alexa Fluor 405 Purity Protein A purified Buffer 50mM Sodium Borate Product Description Mouse Gene ID 3135 Gene Symbol HLA-G Species Human Specificity/Sensitivity This antibody binds an epitope in the alpha 1 domain of human HLA G. It binds the native form of human HLA G1 on the cell surface as well as with soluble HLA G2 isoform in its beta2-microglobulin associated form. It is also reported to cross react with HLA G3. Immunogen The original antibody was generated by immunizing mice with native, properly folded, beta-2-microglobulin associated HLA G. (Uniprot# P17693) Notes Alexa Fluor (R) products are provided under an intellectual property license from Life Technologies Corporation. The purchase of this product and compents of the product or is components, in any acidity to generate revenue, which may include, but is not limited to use of the product and comyents of the product or is components; (i)
