Analysis in human kidney and pancreas tissues using NBP3-43909 antibody. Corresponding PLA2R1 RNA-seq data are presented for the same tissues.

Staining of HeLa cells using the Anti-PLA2R1 monoclonal antibody) .

Staining of human kidney shows weak membranous positivity in cells in glomeruli.

Staining of human kidney (idiopathic membranous nephropathy) shows strong membranous positivity in cells in glomeruli.

Staining of human pancreas shows no positivity in exocrine glandular cells as expected.

Analysis in human kidney tissue.

Staining in human cell lines HeLa and MCF7 exhibiting a relatively high and low expression of PLA2R1 (based on RNA-seq values)) is present in HeLa cells but is absent in MCF7 cells. The anti-HDAC1 antibody was used as a loading control (red signal).
