Fetal Bovine Serum - Charcoal/Dextran Treated

Product Information	
Unit Size	50 ml
Storage	Store at -20C. Avoid freeze-thaw cycles.
Product Description	
Description	Fetal Bovine Serum - Charcoal/Dextran Treated Summary
	Charcoal-stripped Fetal Bovine Serum is used in applications requiring lower levels of hormones, steroids or growth factors in Serum such as insulin and estrogen related research.
	Why Use FBS - Charcoal/Dextran Treated?
	Pre-selected high quality Fetal Bovine Serum is processed using a proprietary Charcoal/Dextran treatment proven to reduce the levels of many hormones, steroids, and other lipid-like components. Each lot produced is tested for various hormones and steroids before and after treatment to confirm the efficacy of the process. All lots of Charcoal/Dextran Treated FBS are manufactured in our ISO 9001:2015 certified facility.
	Specifications
	Purification: Triple 0.1 um filtered
	Sterility Testing: Pass
	Country of Origin: UNITED STATES
	Limitations
	For research use only. Not for diagnositic use.
Species	Bovine
Product Application Details	
Applications	Cell Culture
Recommended Dilutions	Cell Culture
Application Notes	Charcoal-stripped Fetal Bovine Serum is used in applications requiring lower levels of hormones, steroids or growth factors in serum, such as insulin and

estrogen related research.
