SP-1800-7-NB**VECTABOND(R) Reagent, Tissue Section Adhesion**

Product Information	
Unit Size	7 ml
Concentration	Please see the protocols for proper use of this product. If no protocol is available, contact technical services for assistance.
Storage	Store at room temperature.

Product Description	
Description	<p>The VECTABOND(R) Reagent for Tissue Section Adhesion is designed to significantly increase the adherence of both frozen and paraffin-embedded tissue sections and cell preparations to glass slides and coverslips. It chemically modifies the surface of the glass with positive charges to form a highly adherent surface.</p> <p>Features:</p> <p>Tissues remain attached even under extreme conditions such as high temperature antigen unmasking techniques and in situ hybridization VECTABOND Reagent treated slides can be stored for long periods 7 mL concentrate dilutes to 350 mL Treats at least 500 standard slides</p>
Notes	This product is manufactured by Vector Laboratories and distributed by Novus Biologicals.

Product Application Details	
Applications	Immunocytochemistry/ Immunofluorescence, Immunohistochemistry, In-situ Hybridization
Recommended Dilutions	Immunohistochemistry, Immunocytochemistry/ Immunofluorescence, In-situ Hybridization
Application Notes	The VECTABOND(R) Reagent for Tissue Section Adhesion is designed to significantly increase the adherence of both frozen and paraffin-embedded tissue sections and cell preparations to glass slides and coverslips. It chemically modifies the surface of the glass with positive charges to form a highly adherent surface.
